

This is a Capri Cut-out Kit.  
A time-consuming gift  
for kids that grown-ups  
can get stuck into too.

The Capri is a different kind of motor car. A genuine fastback that handles like a sports car and holds 4 adult-size adults – in comfort.

Of course we realise the shape isn't entirely new. Some of the better-known Italian Gran Turismos have had something like it before.

What is new is that we've priced the Capri at prices you can think about paying.

You've got five engines to choose from: 1300, 1600, 1300GT, 1600GT and 2000GT.

The last of which, by the way, will perform to the tune of 0 to 60 in 10.4 seconds.

Which is travelling in anybody's language.

There's something else which makes the Capri different from the others.

The driving position. It's low. Relaxed. Arms straight.

Exactly how a driving position should be.

Finally we'd like to say a word or two about the three Capri Custom Plans.

These are kits of extra equipment that you can have fitted to your car, either singly or combined, depending on the version you choose.

We worked out this idea so that you could have much more say about what goes in and on your car.

But before you start saying anything, have a bash at cutting out the cut-out.

If your finished product looks anywhere near as good as our finished product, you'll be tearing along for a test drive.

Capri: the car you always promised yourself.
